CLEANING, ASSEMBLY & PROPER USE

ASSEMBLY:

Unit will come completely assembled with poly base attached and one complete set of rollers installed. Handle will need to be installed with the supplied wing nut bolt.

DISASSEMBLY & CLEANING INSTRUCTIONS:

Caution: Keep children at a safe distance from machine while cleaning.

1. Remove handle from the drive shaft.
2. Remove the combs from the upper housing by lifting up on the combs.
3. Remove the two upper housing screws from the upper housing.
4. Remove the upper housing.
 - WARNING:** This will expose the blade rollers. Take care when handling the blade rollers. Protective gloves are recommended.
5. Remove the drive shaft components by simultaneously lifting up on each end of the blade roller to separate them from the lower housing. Note: Both rollers are connected.
6. To disassemble the rollers, remove the clip and nylon cap on the end of the shafts and slide the parts off the shafts. Be careful not to damage the nylon cap and clip when removing.

NOTE: Pay special attention to the direction the blades are installed on the rollers. If assembled incorrectly the unit will not work properly. It is highly recommended before disassembly to take pictures of the rollers, paying special attention to the blade assembly. The slicer blades have a bevel. When properly assembled the flat side of the blades will run together. Tenderizer blades have a curve. When properly installed the curve of the blade will face outward.

7. Wash all parts thoroughly with hot water and mild dishwashing liquid. A long bristle brush is recommended for cleaning the blades. Take extra care when handling the blades. Protective gloves are recommended.
8. Dry parts thoroughly before re-assembly.

TO CHANGE ROLLER SET:

Follow steps 1-5 from above.

6. Carefully set aside the removed blade/roller assembly by placing it on a towel up and away from children's reach.
7. Place other blade/roller assembly inside the lower case. Make sure to line the drive with the notch in the lower case.
8. Assemble upper case on top of lower case and tighten housing screws to secure.
9. Insert combs into slits on either side of the upper housing. Note: Do not bend the teeth of the combs. If they are not aligned gently bend them until they are realigned. The teeth of the combs should be inserted between each of the blades.

NOTE: It is very important that the combs are installed properly. If the combs are not installed the meat will simply wrap around the rollers. Disassembly will be necessary to remove the meat from the rollers.
